Edge for eaves of house roof - has wall attachment part, front attachment part and junction integrated to form single unit

MISAWA HOMES CO LTD 94.09.08 94JP-242095

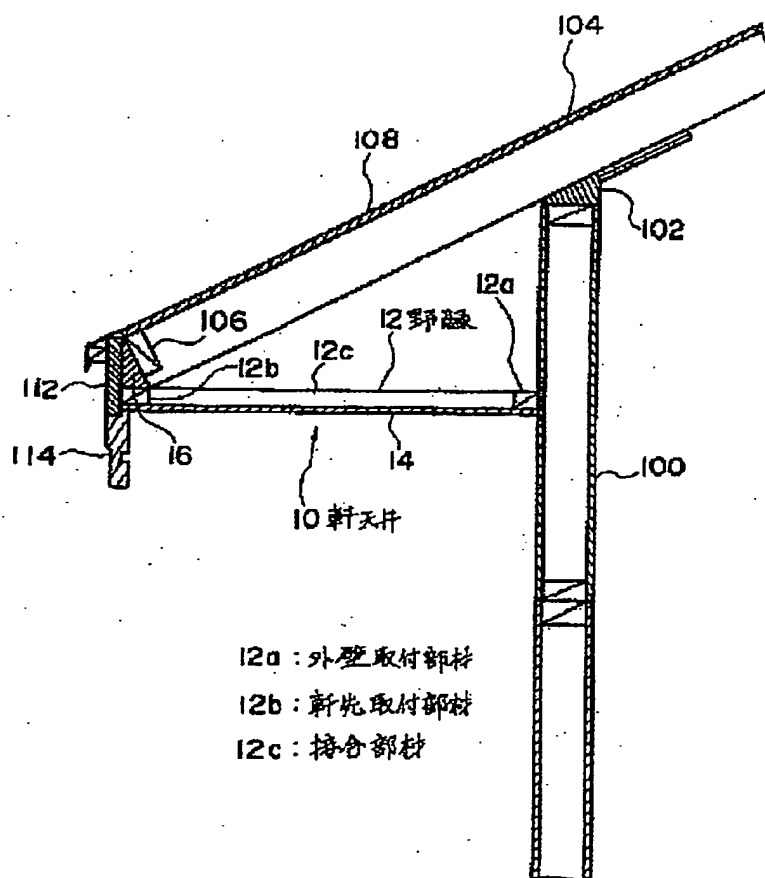

(96.03.19) E04B 9/30, 7/02

The edge (12) has a wall attachment part (12a) connected to a wall of a house, below an eave. A front attachment part (12b) is installed downward to the front of the house.

A junction (12c) is arranged at a joint position where the edge are joined to other edges. The parts of the edges are fixed to form a single unit.

ADVANTAGE - Facilitates connection along outside wall and at corner of house, thus decreasing load of worker. Enables connection buildings of various sizes. (6pp Dwg.No.1/6)
